

## Our strategic vision

CSIRO's Data61 is the data and digital specialist arm of Australia's national science agency. We are undergoing tremendous growth with a focused around three goals:

- **Drive the development and adoption of Artificial Intelligence in Australia**, including through our leadership of the new National Artificial Intelligence Centre and the Next Generation AI Graduates Program.
- **Put digital science and technology at the heart of Australia's recovery and resilience**, to help solve our immediate challenges and to anticipate and prepare for future ones.
- **Reinvent the way science is done**, using digital to revolutionise the future of scientific discovery, using technologies such as AI.

## How to get in contact

We are hiring a range of senior leaders across 8 capability groups to deliver on our strategic priorities.

If you would like to speak to one of our leaders to learn more about our available leadership opportunities, please see a full list of capability groups, and reach out to the respective Capability Lead (Research Director).
